

Artisan Value Fund

QUARTERLY Fact Sheet

Institutional Class: APHLX

As of 31 March 2024

Investment Process Highlights

The investment team seeks to invest in companies that are undervalued, in solid financial condition and have attractive business economics. The team believes that companies with these characteristics are less likely to experience eroding values over the long term.

Attractive Valuation

- Distinct discount to intrinsic value
- Low expectations
- Favorable risk/reward

Sound Financial Condition

- Focus on financial flexibility and liquidity
- Seek to protect capital in difficult environments
- Allows management to pursue value-enhancing initiatives

Attractive Business Economics

- Focus on free cash flow and return on capital capabilities
- Ability to grow underlying business value
- Avoid "value traps"

Source: Artisan Partners/Russell. Class inception: Investor (27 March 2006); Institutional (26 July 2011). For the period prior to inception, Institutional Class performance is the Investor Class's return for that period ("Linked Performance"). Linked Performance has not been restated to reflect expenses of the Institutional Class and the share class's returns during that period would be different if such expenses were reflected.

Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. Call 800.399.1770 for current to most recent month-end performance.

Portfolio Construction

- Typically 30-40 holdings
- Maximum position size generally 5%¹
- Position sizes determined in part by how well a company meets the team's margin of safety criteria
- Attention to economic exposure
- Typically less than 15% cash

¹Limitations apply at the time of purchase. See prospectus for more details. **Margin of Safety**, a concept developed by Benjamin Graham, is the difference between the market price and the estimated intrinsic value of a business. A large margin of safety may help guard against permanent capital loss and improve the probability of capital appreciation. Margin of safety does not prevent market loss — all investments contain risk and may lose value.

Carefully consider the Fund's investment objective, risks and charges and expenses. This and other important information is contained in the Fund's prospectus and summary prospectus, which can be obtained by calling 800.399.1770. Read carefully before investing.

The value of portfolio securities selected by the investment team may rise or fall in response to company, market, economic, political, regulatory or other news, at times greater than the market or benchmark index. A portfolio's environmental, social and governance ("ESG") considerations may limit the investment opportunities available and, as a result, the portfolio may forgo certain investment opportunities and underperform portfolios that do not consider ESG factors. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging and less developed markets, including frontier markets. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. Value securities may underperform other asset types during a given period.

Russell 1000[®] Value Index measures the performance of US large-cap companies with lower price/book ratios and forecasted growth values. Russell 1000[®] Index measures the performance of roughly 1,000 US large-cap companies. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

Unless otherwise indicated, all information in this report includes all classes of shares, except performance and expense ratio information, and is as of the date shown in the upper right hand corner. Portfolio statistics calculations exclude outlier data and certain securities which lack applicable attributes, such as private securities. Artisan Partners may substitute information from a related security if unavailable for a particular security. Totals may not sum due to rounding.

The Global Industry Classification Standard (GICS[®]) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's Financial Services, LLC (S&P). Neither MSCI, S&P, their affiliates, nor any of their third party providers ("GICS Parties") makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including warranties of accuracy, completeness, merchantability and fitness for a particular purpose. The GICS Parties shall not have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of such damages.

Investors should consult their financial and tax adviser before making investments in order to determine the appropriateness of any investment product discussed herein.

Price-to-Earnings Ratio (P/E Ratio) measures how expensive a stock is. Earnings figures used for FY1 and FY2 are estimates for the current and next unreported fiscal years. **Price-to-Book Ratio (P/B Ratio)** measures a company's stock price in relation to its book value (the total amount a company would be worth if it liquidated its assets and paid back all its liabilities). **Fixed Charge Coverage Ratio** indicates a firm's ability to satisfy fixed financing expenses, such as interest and leases. **Active Share** is the percentage of a portfolio that differs from its benchmark. Active Share can range from 0% for an index fund to 100% for a portfolio with no overlap with an index. **Annual Turnover** is a measure of the trading activity in an investment portfolio — how often securities are bought and sold by a portfolio.
